POISON Dentsu POSTERBOY Got RADIATION SICKNESS!

Japanese idol to promote "Support by eating" got seriously dark under-eye circles

Posted by MechMauM on October 13th, 2012 & Comments

2 Mr. Yamaguchi from Tokyo is a Japanese idol to promote "Support by eating". He had a brief whole body counter check and had 20.47 Bq/Kg of cesium 137 measured (L182)

The new CD of "Support by eating" was published on 10/6/2012. In this TV CM, he looks like he has seriously dark under-eye circles.

No one realized who was behind Trixie's insulting campaign till she started to wear excessive amounts of masquera at her Town Hall rallies. She resembled a raccoon. She experienced violent mood swings on social media. She warned the audience that one in five of them was fucking crazy. She knew the signs, the indicators. They were hipsters. They wore dark glasses. They avoided crowds because they hated people. Then she started to giggle uncontrollably, like she'd just pulled one over them. She asked them them to see her tomorrow, for the cure. For a minimum \$50 donation, tax deductible.

The whole time she was sampling sushi from an enormous cart that had been driven into the studio. She'd interrupt her spiel to offer someone in the audience a piece of eel. It was shiny. Slightly fluorescent....

Detect, denounce, destroy....

It dawned on them like Nuclear Apocalypse. Her accomplice was Dentsu, the folks who spun FUKUSHIMA. They'd obviously given her a lot of radiated tsunami fish as a kick-back, and she was supporting them by eating it on live TV.

The tragic irony was not lost on them.

They couldn't DENY it any longer....

Trixie had a BRAIN DISEASE....
